

## ENVIRONMENT POLICY OF PIELIS-GOLF

Pielis-Golf is situated in a north end of lake Pielinen and most of our fairways are rolling in a shorefront of the lake. Pielinen gives our golf course it's own label - on a hot day You can feel it as a pleasant coolness and in a windy day it can be quite challenging. As we are located in a middle of the Holiday Centre, we have a high responsibility to take care that our golf club name - which carries the name of lake Pielinen - stays clean and fresh. We work together with the local Tourism Authorities, local Environment Secretary and Centre for The Environment of North Karelia.

In Pielis-Golf we are committed to comply with the agreed common practice:

- comply with environmental protection laws
- sort our waste and we try to avoid unnecessary waste production
- save electricity and energy
- we strive for responsible and sustainable use of purchasing
- we prefer to recycle and re-use
- we offer the paperless office
- we take care of the golf course of environmental protection and biodiversity elections
- we aim to reduce and optimize the use of fertilizers
